Docket No. E-01933A-15-0100

I placed solar panels on my previous home 4 years ago, and just recently moved and am planning to install a solar system here. I am shocked that TEP is asking the ACC to further reduce the benefit of home solar systems. Climate change is perhaps the biggest challenge the facing us at this time, and we should be doing everything possible to mitigate global warming. Home solar systems is and can be a important component in reducing carbon emissions.

We as a society should be encouraging the adaptation of solar rather than allowing the Utility Industry to discourage it.

It is almost shameful that TEP is now owned by a Canadian company and a foreign entity is now attempting to discourage we Arizonans from reducing our usage of fossil fuels and hence carbon emissions and hence climate change.

Robert J. Kingston MD
